

THE Gleichen Call

TWENTY-THIRD YEAR No. 12

GLEICHEN, ALBERTA, WEDNESDAY, JUNE 12, 1929

SUBSCRIPTION \$2.00 PER YEAR

NEWS FROM MILO AND DISTRICT

The Ivers Boys are now farming the old Bertrand homestead just outside of Milo.

The Municipality is constructing a new highway across the lease between Milo and Armada.

The Municipal picnic and stampee will take place at the Municipal park west of Milo, July 3rd.

Messrs. Leverett and Sidney Page both farming almost in the suburbs of Milo, have built fine new houses and barns this summer. I have not seen the inside of Mr. Page's house but Leverett's new house has every modern improvement in it and is a credit to the district.

Joe McCabe, one of Queenstown's first homesteaders, died in Vancouver on Saturday, May 25th. Mr. McCabe has been in poor health for several years and has had several operations performed on him. But lately he had been getting along well and his death came as a surprise to his family.

While the prospects for another bumper crop is excellent and makes farmers smile the price of wheat is enough to make him swear, especially those who bought options this spring. But then if it was not for the annual crop of lambs how would the professional bunch of speculators make their swag.

Coming back from Calgary a couple of weeks ago I had the great pleasure of crossing the new railway grade and to see the dirt flying a few miles west of Arrowwood. To use a popular expression the sight was good for sore eyes. The building of 25 miles of railway may not mean much to the public in general, but to us who have waited 22 years to see that final link put in that will put our district in direct touch with the western metropolis of Calgary it means a great deal.

Peace River still holds the centre of attraction. Two Milotites, Einar Peterson the well driller, and Alex, the carpenter, made a trip by auto to the Peace River a few weeks ago and were so favorably impressed with the possibilities in the far north that they came back and disposed of their Milo holdings and are going up for good this week to operate a gasoline boat on the Peace and transport passengers and freight. The name of their boat is the "White Lilly" and anybody from here going up looking for transportation on the famous Peace River can hail the "White Lilly". Several cars from here have left to look the country over and attend the sale of the Indian reserve land north of Peace River.

TREES DOING WELL AT MILO

How did your trees come through the winter, is a question people sometimes ask me.

Last winter was not a favorable winter for trees. The fall was extremely dry and practically no snow fell during the winter, still trees are whole come through without a scratch. About the only damage done was the severe frost night we had in May after the snow storm, when some of the very early trees in bud were top frozen a little. Otherwise, judging from the amount of blossoms both on the apple and plum trees, it looks like a bumper crop fruit year.

My experience with fruit trees over a number of years show that we now have quite a number of both crab apple and hybrids, both apple and plum propagated by Dr. Hansen of South Dakota and the Canadian experimental farms that are perfectly reliable to plant and do not winter-kill to any extent. Not only are these trees hardy but most of them will begin bearing the third year after planting and a few the second. These early bearing trees are a great improvement over the old kind of fruit trees that took 10 to 12 years to bring into bearing.

Two years ago I set out several

young trees of the hybrids variety and this spring several of these, both apple and plum trees, have a lot of blossoms on them.

The Manitoba wild plums should be planted more generously. They are as good as a windbreak, have fine blossoms and bear very good fruit. Mine have been chock full of blossoms this spring and look like fairyland.

ARROWWOOD NEWS

Where is the dry year the local weather prophets were telling us about a short time ago?

Mr. Oliver is building a very attractive residence for the International Harvester agent.

Quite a surprise was experienced by a customer in purchasing liquid shoe dressing for 15c in Arrowwood last week.

There has been two attempts at an Arrowwood newspaper but we are still depending on the Gleichen Call and note the local advertising in each issue.

How about more boxing in Gleichen. The Arrowwood fans are anxious to witness more good bouts such as the last seen in Gleichen.

Mr. Kelly's new garage and improvement shed is quite a building and a very good addition to town. He has the Massey-Harris Agency. Mr. Keith was the building contractor.

Mr. Harp of Shouldice and McMillin of Arrowwood started north on May 30 to look the north country over. They expect to stop at Olds, Edmonton and go west of Edmonton, then east to northern Saskatchewan.

Many signs are being erected at the new village west of Arrowwood and it appears that the local merchants are to have branch stores there. The building to house the Bank of Nova Scotia is under construction at present.

The Arrowwood Hotel building has been completed and the furnishings and equipment arrived from Calgary last week. Everything is first class quality and new. There are more rooms and the building is larger than the former hotel which was destroyed by fire last March. Mrs. Horning expected to have everything in readiness for Arrowwood's Sports Day.

Clyde Sharp is moving to northern Saskatchewan, going over the road with an Oil Pull engine and two wagons in loads of effects. He expects to make the journey in ten days.

SAVATION ARMY SELF-DENIAL FUND CLOSES THIS WEEK

Ensign Tanner states he will complete his canvas this week for the Salvation Army Self-Denial fund and all who may not be able to meet him are respectfully asked to send any donations they may want to make to him at the Gleichen Eventide Home. The good work is already too well known to require enumerating at this time. This year the Army is celebrating the centenary of the birth of William Booth, the founder of the Army, and there is scarcely a country in the world that is not co-operating in this celebration in his honor and the wonderful work he accomplished.

By helping the Army you are helping the most needy in the world, and you can rest assured there is no other organization that will make your dollar go as far and see that only the deserving are aided.

Not a few are asking why Gleichen is not in the Baseball League this year. The answer is that Gleichen boys believe in having their own fun and refuse to pay outside men to take joy out of the game. Like hockey Gleichen wants to see home-brew sport free from the almighty dollar.

Quite a number of the Gleichen football fans journeyed to Calgary today to witness the Welsh eleven Old Country football team in action.

Canadian Club Free Children's Sport Dominion Day

On Dominion Day, July 1st, the Gleichen Canadian Club will hold a free sports day for all school children. At present the program is being prepared and will contain good prizes for games of all kinds. The aim of the Canadian Club is to give the children a happy time to keep alive in their memories Dominion Day and all it stands for among Canadians throughout the length and breadth of Canada.

In order to make everything free for the children some funds are quite

necessary and that all may have an opportunity to participate in giving the boys and girls a good time a tag day is announced for Saturday, June 22nd, when every person will be given a chance to contribute as they feel they should.

The movement is a good one and is already endorsed by the Board of Trade, Gleichen branch of the Canadian Legion and other organizations and promises to be a real festival for the boys and girls of this district. All are welcome.

A GOOD SUBSTITUTE BEING SECURED FOR BOXING SHOW

Saturday, June 22nd.

Owing to Frankie Jackson sustaining a broken jaw last Friday night at Calgary and being now in the hospital he will be unable to meet Mel Cowie at Gleichen on June 22nd.

However, Manager Jack Moss has the offer of several good men to fill his place, and expects to get Eddie Edward of Calgary as substitute and failing him will get Louis Kwiatk of Drumheller. Both are said to be exceptionally good and have records of great work and will not disappoint the Gleichen crowd on the 22nd.

The rest of the card will be carried through as originally stated and is said by some who should know an even better card than the one put on in Calgary Friday last.

Ringside seats are already selling well Manager Moss states and a good crowd is coming down from Calgary to witness the Gleichen show as well as from many other points.

MEADOWBROOK DEFEATS STRATHMORE 5-8

A rather small crowd saw an interesting baseball game at Meadowbrook last Sunday when Meadowbrook won from Strathmore by a score of 8 to 5. Some real fast baseball was played at times, the Meadowbrook players only making one error in the line frames. Robinson pitched a steady game for the home-team while Orellen for the visitors was wild in the early innings but settled down to pitch good ball as the game progressed.

Score by innings—
Strathmore 0 0 0 1 0 0 3 0 1—5
Meadowbrook—3 0 3 0 0 1 0 1 x—8
Next Sunday the Meadowbrook boys will be hosts to the Carseland team.

The date of the Meadowbrook Baseball Tournament has been set for July 4th when a good time is expected.

The Meadowbrook ball team defeated the Carseland team Tuesday night at Carseland by 6-7. It was reported to be a very good game.

The crop conditions in the Gleichen district are of the very best. Many farmers remark that never before have they seen in this district a spring as ideal as 1929. Compared to 1928 crops are far more even in germinating and nearly 2 weeks earlier. At the present time there is plenty of moisture in the ground. Wheat acreage on summerfallow is about equal to 1928, but less wheat has been stubbled in this year. Oats is 100 per cent. seeded and of fine appearance. Barley is being raised as a medium to fight weeds and are being sown later thereby killing many weeds which have germinated. Pastures are green. There is an abundance of hay and greenfeed growing. So far no damage of any kind has been reported. Very few days of heavy wind have prevailed and cut worms do not seem to work at all. Beef cattle are in the pink of condition. Young stock and horses are thriving well on the range. In general prospects for 1929 are excellent.

THIRD FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton, June 8, 1929

Crop conditions throughout the greater part of the province are very satisfactory and grain is making splendid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the third fortnightly crop report of the season. Moisture requirements for some weeks have been supplied by the heavy rains which visited the southern section of the province over last week-end, and all crops are growing rapidly.

Prospects in the Peace River district are very promising and any immediate danger of drought has been removed by frequent rains during the past three weeks. Crops growing on land newly broken last season are looking exceptionally well.

In Edmonton district and for some distance south and east the continued absence of precipitation is beginning to cause some concern, although in very few localities has the drought as yet seriously reduced damage from soil drifting, but this is by no means general. Breaking on new land has been retarded to some extent in this section of the province by the absence of moisture in the soil, while in the south a larger acreage than usual is being broken in readiness for next season's crop.

Early sown wheat in most localities is now covering the ground, and an exceptionally good stand of fall wheat is reported from many districts in the south. Alfalfa and sweet clover are making a vigorous growth, and prospects of an increased tonnage of sugar beets are excellent. Livestock generally is in good condition and in a number of districts increased numbers of farmers are making a start with a small flock of sheep.

Judging from the number of inquiries already received by the committees in charge of arrangements, a large attendance of farmers and others interested in crop marketing problems is promised for the Alberta Institutes of Co-operation to be held at Lethbridge, Olds and Vermillion during the week of June 24th. Arrangements for the programs at the three points have been practically completed and the caliber of the speakers secured leaves no doubt as to the success of the meetings. Arrangements at each of the points are in charge of an enthusiastic local committee and those who plan to attend either the adult or junior sections of the Institutes should communicate at an early date with the registrar of the Institute they will attend.

The travelling clinic under the direction of the Alberta Department of health which has rendered splendid service in many outlying sections of the province during the past two years has started on its itinerary for the 1929 season during the past week. Some 34 centres will be visited and the doctors, dentists and nurses in attendance will follow up the work which has been done in advance by the inspection staff of public health nurses through rural schools. The clinic will again be in charge of Dr. R. T. Washburn, medical superintendent of the University Hospital. Dr. Margaret Owens, the first woman doctor employed by the Department of Health is a member of the clinic staff and will pay particular attention to

Town and District News

The school examination start Monday next.

L. F. Chrestenson, the Arrowwood live merchant, is quoting prices in his ad this issue you should read.

Mrs. A. E. Jones left Sunday afternoon to spend a few days with old friends from Ontario at Calgary, who have been touring B.C. for sometime.

Good headway is being made in installing the new septic tank south of the railway track and residents in that vicinity will be glad when it is completed.

Glen C. House has a big outfit rounding up horses in Crawling Valley. Mrs. W. W. and Miss Vivian Brown spent Sunday at the camp and report having greatly enjoyed themselves.

Near Standard Ray Cunningham and Willard McDowell were struck lightly by lightning while operating a tractor and as they reached an auto were struck again and for sometime were unconscious.

So far the list of the Arrowwood sports held last Saturday has not reached the Call office. A splendid day's sport was enjoyed, although the electric storm that night sent many home early.

A report from Chancellor states that while 'Chick' Duncan was driving two horses and leading five he was struck by lightning himself and unconscious for a time and two horses in the centre of the five were killed by the same flash, while the others were not injured.

Monday night four good horses were stolen out of J. O. Bogstie's corral. They were traced to the crossing of the railway track on to the Blackfoot reserve by Officer Batt and he with Sergt. Tomlinson of the R.C.M.P. and his Indian scouts are continuing the search.

The annual Sunday School picnic of the United Church will be held on Thursday, July 4th, at the same place on the Bow river as last year. Various committees have already been appointed, such as sports, transportation, food, lemonade and ice cream, and everyone is asked to reserve this date for the picnic.

The decision to increase the capacity of the Alberta Wheat Pool Elevator No. 1 at Vancouver by 2,750,000 bushels giving it a total capacity of 5,250,000 bushels, is announced from the head office of the Wheat Pool in Calgary. This additional will make the pool elevator the largest terminal on the Pacific Coast. The pool has two other terminals under lease at the Coast, one at Vancouver and the other at Prince Rupert and with the completion of the new building, will have a total terminal storage capacity of 8,150,000 bushels in these two ports.

The Cluny Gun Club dance was a great success. Many attended from the treatment of women and children included in the party also will be Dr. A. E. Haycock, Provincial Institutional Dentist; Dr. H. E. Gleichen of the University of Alberta and four trained nurses.

different points and all ing a good time. A Provincial Library Dec 31 1929.

The music was supplied by Mr. Birch and he certainly deserves credit for the fine music supplied by him, being the best supplied for some time and was appreciated by all present. The ladies supplied the eats which was enjoyed by all. The club these women for their faithful work, takes the opportunity of thanking Before the dance a shoot was held and two prizes were given. Mr. G. Beatty and C. Robinson were the winners. The next shoot held by this club will be Wednesday, June 19th. All are invited to attend. Arrangements are being made to keep the drive on against the crows and magpies and any one who wishes to help up towards this will be welcomed.

DEBT BECOMES EFFECTIVE JULY 1ST

The new Small Debt Recovery Act which went through the last sitting of the Alberta Legislature will be on the statute books of the Province and come into effect July 1st. The first sitting of the court under this new act takes place in Gleichen early in July. This promises to be an interesting session, as business men have been patiently waiting for this to get on the statutes. It now compels the debtor to appear in person, and if he does not do so he can be brought in by order of the judge. Arrangements have to be made with the court towards the liquidation of the accounts. Men who have been running bills with no intention of paying them are now liable to be jacked up rather abruptly.

Flying Fingers and Flying Heels

Helen McGregor, of Winnipeg, "The Flying Pianist" whose "flying fingers" earned her unofficial title, and Myrtle Cook, whose flying heels won her the official title of Amateur Lady Champion of the World at the Olympic Meet last year, take a lesson in navigation from Captain Dot of the Canadian Pacific liner "Montrose".

Miss Cook, who now covers women's sports for the Montreal Star is not unfamiliar with the air, having flown the English Channel on several occasions when on the other side at athletic events. Miss McGregor is one of the few women familiar with the controls of trimotored planes. She travelled west as a passenger in the Junkers plane which was landed at Montreal from the Canadian Pacific freighter "Beaverbrae" for the Western Canada Airways, Limited, by whom it will be used in air mail and express services.

ECHOES OF GLEICHEN TWENTY YEARS AGO

Taken from the Call in 1909

The Southern Alberta Land Co. sur-
veyors are moving out to the Little
Bow.

Mrs. D. C. Wishart and children
spent a couple of days at Calgary last
week.

Mr. and Mrs. James and family
spent several days with friends in Cal-
gary last week.

Miss Larkin and Miss Arnold have
been visiting at Calgary and Banff
since last Thursday.

Kid Scaler has been creating plenty
of fun in his "work-outs" with local
artists the past few days.

The way the French-Canadians are
arriving here it will soon be necessary
to learn the language.

Dan McKay of Greenwood, B.C., vi-
sited his old school friend D. Gillespie
for a couple of days last week.

A. J. Maisey already has a concrete
foundation for a new residence on his
property on Sixth avenue.

The Southern Alberta Land Co. canal
work, south of the Bow, has been mak-
ing splendid progress the past week
or two.

J. D. McArthur is bringing in three
steam shovels from Okotoks across
the country to be used on the canal
work across the Bow.

S. Hindle who has been on the Cana-
dian Bank of Commerce staff since
last summer, has been transferred to
the branch at Medicine Hat.

E. Wyndham expects soon to be in
the townsite business on a large scale.
He is a great booster for his new town
and lots should sell at high prices.

F. J. Turner, formerly manager here
of the Bank of Commerce, spent Fri-
day afternoon in town visiting his
friends, accompanied by Mr. Mason of
Saskatoon.

Madams S. J. Stocken, S. M. Dick-
inson and W. P. Evans returned Sat-
urday from a convention lasting three
days of the Woman's Auxiliary in
Calgary.

Rev. Castle and J. L. Laycock are
trying to out rival each other in their
adjoining lawns. This is a good thing
and materially helps in the improve-
ment of the town.

Pat Burns, the famous meat king of
the prairie, arrived in Gleichen on
Monday and drove out to Queenstown
Just what particular business brought
him here is not divulged.

Geo. Scott, who has been assistant
to A. F. Larkin in the McCormick im-
plement business, has purchased Wal-
ter Ross' interest in the Deering Co.
and with his son will conduct that
agency in future.

A bee will be held at the race-track
next Tuesday evening to make im-
provements to the course. All lovers
of sports are urgently requested to
join the throng in the efforts to get
everything in good shape for the 1st.

A bridge across the Red Deer river
is a very grave necessity, and as
there are now great numbers of land
seekers in that vicinity and many are
locating there permanently. The
number of accidents and drownings
make it a necessity.

The Calgary Herald had a wild re-
port of the disappearance of two Ger-
mans, who had a contract of plowing
at Cluny. Sergt. McLeod, however, soon
learned the men had urgent business
that took them west in a hurry, which
they did not take time to explain to
any person.

The dance given by Mr. and Mrs.
Roy Allen on Tuesday evening of last
week was in honor of Mr. and Mrs.
O. Desjardine, who recently returned
from their wedding trip. All who at-
tended have not yet ceased to talk of
the hospitality shown them on the oc-
casion.

A report came from Dorothy that
Geo. Wells was drowned in the Red
Deer river last Thursday while at-
tempting to feed at Frodoon feed.

The information that can be obtained
of the unfortunate incident is meagre,
but it is said his horse turned com-
pletely over on him.

H. Francios' team made a lively run
about town Tuesday morning. They
became unmanageable near McKay's
store and as the wagon had two boxes
and a stove on it jumped when his
seat jared loose, sustaining a sprained
ankle and some bruises, and is now go-
ing about with the aid of a crutch and
cane. The horses were finally captured
near the school house.

A couple of miles east of town the
ditch was turned loose last week and
put the road in a very bad condition
and the farmers in that vicinity were
busy helping travellers out of the mud
holes for several days. They discussed
the matter among themselves and de-
cided it would take too long to com-
municate with the government and
get the work done, so Tuesday Messrs
Telford, Ward, Walback and Arnold
each put on teams and are making the
necessary repairs at their own expense.

A boxing contest has been arranged
to be held in the Foresters hall next
Saturday evening, the 12th, between
Kid Scaler of Spokane and Kid Mc-
Fadden of San Francisco under the
auspices of the Gleichen Athletic Club.
Scaler and his manager, Jack Kerns,
arrived in town Monday and he has
been getting into shape in bouts with
Alf Daw and other local men. Mc-
Fadden will arrive Saturday after-
noon. The promoter claims the con-
test is to be one of the best ever pull-
ed off in Alberta and a special train
has been arranged for to bring down a
lot of Calgary sports.

D. Martin, Sr., was in town several
days last week, from Rosebud
creek, this being his first trip to town

for more than two years. He has
been visiting his daughter, Mrs. D. L.
Brereton and numerous friends. Mr.
Martin said it amazed him to see the
improvements in Gleichen during the
past two years. His children had told
him he would get lost in town before
leaving, yet he was quite unprepared
for the changes that have transpired
during his absence. Mr. Martin claims
to be the oldest pioneer of Gleichen. He
admits that the late V. J. Beaupre was
here before him, but now he is the
oldest "old-timer." He readily tells of
the arrival of all others and in conver-
sation told how many of the pioneers
began with little or nothing, but who
today are well-to-do citizens.

REV. T. W. CASTLE NOW IN ENGLAND

Many readers of The CALL will be
interested in the following item of
news copied from the Canadian
Churchman of May 23, 1929:

The Rev. Thomas W. Castle, F.R.A.
I., M.R.A.S., for the last two years
vicar of St. Mark's Newcastle-upon-
Tyne, has just been instituted to the
vicarage of the Parish Church of Con-
gleton, Cheshire. Mr. Castle was or-
dained in 1909 by the Bishop of Cal-
gary after having served as lay read-
er on the Blackfoot Indian Reserve.
After his ordination he was appointed
missionary at Gleichen, Strathmore
and Rosebud Creek. Congleton to
which he has just been appointed, is
one of the oldest towns in England
its charter dating back to 1147. Even
before that date there was a church
standing on the spot where the pre-
sent church now stands. The present
church was erected 1741 and is of
considerable interest containing the
Mayoral and Aldermanic pews.

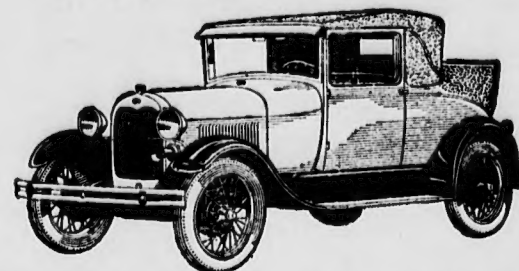

Always laugh when you can; it's a
cheap medicine.

The SPORT COUPE

is ideal for Two or Four

THE Ford Sport Coupe is impressively smart,
yet sturdy and substantial. Combines the low,
fleet lines of the roadster with the advantages of
a closed body. A convenient parcel shelf inside
the car accommodates small bundles. The well
cushioned rumble seat provides room for two
passengers or ample luggage space. Your choice
of a variety of colors—an unusual feature in a low-
price car.

Come in and see how this smart model offers both
Coupe snugness and four passenger comfort
Drive one yourself.

Think what it means to own a SIX!

NOW Chevrolet affords you the opportunity to indulge your preference for six-cylinder performance... without going outside the price-range of the six.

And the Outstanding Chevrolet does more. It provides the distinctive automotive styling of big roomy bodies by Fisher, finished in the season's smartest colorings. It affords a completeness and quality of appointments in keeping with its external beauty. And it gives you, in addition, the safety of sure, smooth, four-wheel brakes, the easy-going comfort of resilient, specially-designed shock-absorber springs and the dependability and economy for which Chevrolet is so justly renowned.

Let your Chevrolet dealer arrange a demonstration... and learn what it means to own and drive a six.

Threshing Results With Combine, Windrow, Pickup

BY J. K. MCKENZIE, B.S.A., ASST.
SUPERINTENDENT, H.W.P.
CURRENT EXPERIMENTAL FARM

The most outstanding development in harvesting methods apart from a vast increase in the number of combines used in 1928, was the introduction of the swather, or windrowing device, and pickup. These implements are auxiliaries to the combine and are designed to increase the utility of the combine. Whether they did so or not is still a debatable question, but certainly they were a pronounced factor in selling the combine. Many farmers, who refuse to let their crops stand in the field, until ready for straight combine harvesting, were attracted by the idea of the swather. They could commence operations just as early with the swather as with the combine, and apart from any financial benefit derived from its use, it gave the farmer something to do at a season of the year when habit and custom demanded idleness.

RESULTS IN 1928
On this station an attempt was made to compare the relative efficiency of the straight combine, the swather and the header-barge. The last is a species of dump car which received the headed grain from the combine. The grain is dumped on the field in the form of small stacks, having an approximate length of 14 feet, six feet in width and 8 feet high. The grain was left in the stack until dry. The combine with the knife and reel removed, was used to break the stacks. The header-barge and swather were operated at intervals beginning with the normal rate of binder-harvesting and continuing until the grain was dry enough for straight combine harvesting. Moisture determinations were made of all grain harvested by the swather and header-barge at three-day intervals extending from the day of cutting until that of threshing. In the case of the first cutting by the header the following shows the rate of decrease of the moisture content:

On Aug. 29 the moisture content was 16.5 per cent. On September 1 the moisture content was 19.14 per cent. On September 4 the moisture content was 17.26 per cent. On September 7 the moisture content was 15.23 per cent.

In order to put the header-barge to a more severe test it was used on another field where the crop, in addition to being very green, was badly infested by green pigweeds. The moisture content on the day of cutting was 48.34 per cent. Three weeks later the stacks were threshed and the moisture content of the grain was 14.41 per cent.

The most outstanding feature of the foregoing result is that the swathed grain, and particularly that which was swathed at the normal time of binder harvesting, did not dry out any earlier than did other the standing grain or grain in the stock. It does not appear from the foregoing figures that the use of the swather in this case advanced the date of threshing with the combine to any marked extent.

UNEVEN GERMINATION

Owing to the peculiarities of the spring season, there was a great amount of uneven germination in all grain crops. This resulted in an excessive degree of uneven ripening. It was hoped that the use of the swather would overcome this disability. The green portions of the crops swathed did not dry out any earlier than those in the standing grain.

Neither standing grain nor swathed grain suffered any marked damage during the waiting period. The weather was unusually fine and dry. The growth of straw was considerably heavier than that of a normal year, hence the amount of green weeds was so small as to constitute no serious impediment to straight combine.

In general it may be said that the season was not such as to allow for a severe test of the merits of the swather except in regard to the matter of speeding up the operation of the combine by reason of an earlier start. Owing to the necessity of leaving the grain in the swath for upwards of two weeks, the greater portion of the initial advantage in time-saving was lost. In addition the extra cost of swathing, amounting to about as much per acre as the loss of the inability of practically any make of combine to attain a speed of over two miles per hour when plowing up the heavy swath, has had a no lessening effect on the majority of the

operators of swathers.

THE SWATHER ON DIFFERENT CROPS

In the districts where Marquis wheat is the principal crop, the value of the swather is still in doubt. It may possibly be useful even in the Marquis wheat districts when used to a limited extent on weedy fields and where uneven ripening prevails. It is unlikely that it will be used so extensively by the individual farmer in succeeding years. Where oats, barley and fall rye are extensively grown as well as varieties of wheat more prone to shattering than Marquis, the swather or some auxiliary to the combine is necessary if combine are to be used.

The header-barge showed up very well in the past season. Fields here ripening was particularly uneven and fields infested by green weeds were successfully harvested by the header-barge. The stacks dried out perfectly and the grain when threshed was of good color and the grades obtained compare favorably with those obtained for binder-cut grain or swathed grain. There still remains the possibility of heavy rain at a considerable duration wetting the stacks to the bottom.

COST OF HARVESTING WITH HEADER-BARGE

The twelve-foot header maintained an average speed of 1.5 miles per hour when due allowance was made for the time required to dump the barge. One man and six horses were used on the header and two men and two horses on the barge. The header harvested 218 acres per hour at an average cost for man and horse labor of 71 cents per acre.

As four horses were able to draw the combine from one stack to the next, the cost of threshing the stacks is somewhat less than the cost of other threshing ways or straight combining. In a fifteen-bushel crop there was one stack per acre. The average time elapsing between the commencement of threshing on one stack and the commencement of the next was less than 5 minutes. There fore two men were able to thresh the stacks on 7½ acres in one hour. In a 30-bushel crop only half that could be threshed in one hour. Evidently the removal of the knife and reel gives the combine motor a considerable amount of surplus power for threshing purposes. At no time was the machine in danger of plugging although two men were engaged in throwing the headed grain on the combine table. When the combine is equipped with a straw spreader no trouble will be experienced by reason of the straw piling up at the reel end.

Two baby black birds were great attractions recently at the Detroit Sportsman's Show. They were from Paris, Louisiana, at Mattawa, Ontario, and were secured to their destination by a member of the C. P. K. general tourist department, who had secured a pair to show in proof of the existence of the babies' first teeth.

Enough flowers are planted by the Canadian Pacific Railway each year to beautify a couple of cities. The floral branch each year sends out to station agents and employees along its line plants, bulbs, shrubs, seedlings, and seeds by the tens of thousands to decorate the company's railwayway.

Five railway cars were required to move the equipment of the mammoth Casamart Organ recently installed in the new Royal York Hotel in Toronto. The hotel is the tallest building in the British Empire.

Tyndall stone, which shows to great effect in the famous spring terrace Hotel in the Rockies, is to be used in the construction of the new building for the T. Eaton Company in Toronto, the tallest building in what is now being built.

The year's champion cattle raiser in British Columbia is Andy Turner, twenty-two-year-old daughter of Jack Turner, Calgary. He is a breeder. Her 14-month-old short-horn steer, sired by British bull, the quail and weighed around 1,100 lbs. was sold for \$1,000 at the sale of all breeds at the Kilmorie hotel sale and fat stock show.

Each set of equipment of the Trans-Canada Limited and Mount Allison, and the new rolling stock having added considerably to the fleet of the railway, the C.P. of the famous railway, the real work of winter building special sleeping cars for this special duty service between Montreal and Vancouver and St. John's and Vancouver.

The Indian of old could wield a wicked tomahawk, but today he can handle a mass brass. The paleface has mounted on the saddle and slinks by Indian gaffers, and it is likely that his Indian gaffers will develop even greater power. Indian children, it has been decreed, are to be used on the children home of the future. The Indian generation of future generations are likely to become, and are being, a more and more civilized race.

Gleichen Call, Job Department, Phone 12

A Cockney plumber was called to Ealing to look after some defective pipes during a recent cold spell. "E-A-I-I-N-G," he called. Naturally, he left his tools at the shop, and then phoned his assistant to bring them.

"Where are yer?" asked the helper. "Ealing." "Oo, do yer spell it?" "E-A-I-I-N-G." "Oo, Gortlinny, I can't hear yer hat, mate!" "All right, I'll give yer the letters: "

"E—for Emry;" "A—for 'at 'ooose cat's;" "I—for 'where yer goin' now yer die;" "E—for Emry;" "O—for Gortlinny! Got it mate!" "Right!"

Ben Bernie to Open Royal York

Top: The Royal York Hotel will extend out, even from the side, below: Ben Bernie and his orchestra

"I hope you like it." To millions of radio listeners, that announcement, coming from Ben Bernie, "the young maestro," is a fulfilled promise of symphonic music of extraordinary quality. Though Ben Bernie cannot possibly have spent a penny before the many millions for whom he is the favorite of radio broadcasts, his name and the music for which it stands have become household words throughout the world, emblematic of the symphonic jazz era. It is for that reason that Ben Bernie and his World-Famous Orchestra have been chosen above all others to open the new Royal York Hotel in Toronto, the tallest building in what is now being built.

For the past seven years Ben Bernie and his orchestra have been featured at the Hotel Roosevelt in New York, one of the best and most widely known hotels of the Metropole. The Ben Bernie orchestra made the Roosevelt grill the favorite rendezvous of dance lovers, young and old. Ben Bernie and

Orchestra are also exclusive Brunswick recording artists and are featured by that company wherever phonograph records are played. Ben Bernie's music is distinguished for the ingratiating rhythm of his orchestrations and the symphonic overtones applied to jazz. It is pre-eminent among the "new jazz" orchestras for the quality of its music. Ben Bernie's orchestra are arranged with the greatest of care and artistry and are played by an aggregation of artists each of whom is an outstanding master of his medium.

Unrivaled in the Ben Bernie Orchestra effort, in addition to the familiar popular tunes, symphonic jazz, and the Ben Bernie phonics. The Ben Bernie arrangements of "Rhapsody in Blue" is a symphony in one of the most colorful of modern symphonies, striking a balance between the dramatic quality of jazz and the austere equality of the classical, and appealing with equal force to lovers of the old and the new in music.

WORLD HAPPENINGS BRIEFLY TOLD

The question of the eligibility of women for appointment to the Senate of Canada is expected to be considered by the Judicial Committee of the Privy Council shortly.

The United States has communicated to the League of Nations its agreement with Canada concerning radio communication between private experimental stations.

Dr. Hugo Eckener, director of the Zeppelin Company, emphatically denied the trans-Atlantic dirigible Gratz Zeppelin had been sold or that he was negotiating for its sale in the United States.

The treaty between Canada and the United States designed to conserve the sockeye salmon fisheries of the Fraser River, will not be ratified by the Canadian parliament this session.

Fatally struck by a wire cable which snapped under a heavy load, Mike Bizicek is dead at The Pas. The cable being wound in the process of loading a gravel train pounded Bizicek's chest when it broke.

Sir Colville Barclay, British ambassador to Portugal, died in a London sanatorium following an operation. He was councillor to the embassy at Washington in 1913, and minister plenipotentiary to Washington in 1918. He was 60 years of age.

Twenty-five British boys coming out under the auspices of the department of agriculture of the Saskatchewan Government, were among the 174 passengers from the "Andania" who arrived in Winnipeg over Canadian National recently.

A slim line of railway steel from Cranberry Portage, jutting along toward Cold Lake, begins to stretch farther into the rich mining land of Manitoba's north. Work has just begun on the Cold Lake branch, but the line is expected to be operating by September.

Signaller Deserted Post

Member Of Scots Guards Has Been Discharged From Army

George Siverwright, the Scots Guards signaller who shattered all British military traditions by deserting his post in front of Buckingham Palace not long ago, will not be a heroic figure for tourist and nursemaids' eyes any more.

He was found guilty by a court-martial and was sentenced to 112 days' hard labour in a civil prison and to be discharged from the army with ignominy.

Siverwright had pleaded that he was sleeping.

Cause Of The Noise

"What was all that noise oval at 'yoh house last night?" asked one colored woman of another, "Sounding like a lot of catamounts done broke loose."

"Dat? Why dat was nothin' only re gemman' from de furniture store collectin' his easy payments."

Authorize Court Action

Persons charged under the Criminal Code in Yukon territory with an indictable offence may, at the discretion of the minister of justice, be tried before a court in northwest territories. This authorization was given in a bill passed by the House.

Evidently Lost

Speaker (after forty minutes of the usual talk!) And so at 20 I faced the world with 50 cents and a clear conscience.

Very bored voice from the rear row: "And what happened to the conscience?"

Rush For Land Still Growing

Homesteading In Northern Alberta This Year Has Been Unprecedented

The land rush to Northern Alberta continues apace. It is reported by the Edmonton offices of the Canadian National Railways Colonization Department that approximately 1,000 new settlers with capital aggregating more than one million dollars, had gone into the Peace River country and Northern Alberta since the first of the year and up to the first week of April. It is estimated that during April alone nearly 1,500 settlers will settle in these districts. During the period of April 1st to 15th, a total of 312 settlers with capital totalling \$170,000 went to the Peace River District. Among these was one man with \$20,000 capital, another with \$14,000 and another with \$12,000.

During the first quarter of the year 400,000 acres of government land were taken up by homesteaders in the four western provinces, an increase of nearly 100,000 acres over the same period of last year. In the period mentioned, 136 homesteads were taken in Manitoba, 994 in Saskatchewan, 1277 in Alberta, and 96 in British Columbia. Homesteading in Northern Alberta has been unprecedented during this period.

Every month so far this year has seen homestead entries at the Edmonton office double over the corresponding months last year. For March alone the total was 226, as compared with 109 in March, 1928.

Last year there were 3,370 homesteads filed on in the Edmonton district, an increase of 147 per cent. over the previous year. There is every reason to believe that the increase noted so far this year will not only be kept up, but may even exceed that of 1928, over 1927. Even if the figures only double, it will mean that close to 7,000 homesteads will be taken up in this district alone.

Recipes For This Week

(By Betty Barclay)

HONEY CORN FLAKE MUFFINS

1½ cups corn flakes.
1½ cups graham flour.
2 cups white flour.
1 tablespoonful shortening.
2 cups milk.
½ cup honey.
5 teaspoonful baking powder.
Mix melted shortening with honey, add to one egg beaten lightly, then add milk. Stir in the dry ingredients which have been thoroughly mixed. Bake in well-greased muffin tins for thirty minutes. (Will make 32 muffins.)

SIRLOIN STEAK JULIENNE

Cut sirloin steak that is about three-quarters inch thick in three-inch squares. Roll in flour, brown both sides lightly in frying pan. Place browned squares in baking dish, sprinkle with salt and pepper lightly. Cover with tomato puree and for each piece of sirloin steak allow one teaspoonful of honey. After covering with tomato puree, add the honey. Then place a layer of onion and celery strips over the entire top, cover pan and bake slowly for two hours. Uncover, and bake for about fifteen minutes in good hot oven to properly brown steak. At least four or five strips each of onion and celery should be allowed for each serving.

Canada's Egg Trade

Statistics prepared at Ottawa show that during 1928, Canada was the highest priced egg market in the world. With imports of shell eggs about equal to exports, Canada for the first time in a long while produces sufficient eggs to meet the domestic requirements. Consumption of eggs in the Dominion has increased, along with production, especially in British Columbia. The average per hen has risen from 78 in 1921, to 95 in the past year.

Was Well Trained

I hereby sentence you to twenty years at hard labour in the state penitentiary," said the stern old judge "And what request have you to make?"

"Just one, Your Honor," said the prisoner. "Please call my wife and tell her I won't be home for dinner."

"Your wife is talking of going to France this summer. Have you any objections?"

"No, certainly not. Let her talk."

Winnipeg is the home of upwards of 850 diversified industries which produce over \$152,000,000 worth of goods annually.

Germany took only a few hours to invade, but is taking many years in evading.

CHINESE GIRLS GRADUATE

Miss Jean Mark and Miss Fannie Lee, shown above, are the first two Chinese girls in Canada to graduate in physical education. The girls trained at the Margaret Eaton School of Physical Education, Toronto. Photo by Ashley and Crippen.

Supplementary Estimates

One Hundred Thousand Dollars Voted For World's Grain Congress

Supplementary estimates \$12,609,500 were tabled in the House of Commons by Hon. James A. Robb, minister of finance. General supplementary estimates tabled last year amounted to \$10,583,000. This year there is an appropriation of \$4,200,000 to complete reparation payments, \$221,500 for deficits on the eastern lines of the Canadian National Railways as required by provisions of the Maritime freight rates act, and \$750,000 for a loan to the Canadian Government Merchant Marine.

The general supplementaries this year amount to \$7,438,000 as compared with last year's \$10,583,000.

Among the larger items in this year's supplementaries are:

\$600,000 for the purchase of lands and commencement of construction of certain penitentiary buildings; \$500,000 additional for health of animals branch; \$100,000 for world's grain congress; \$250,000 additional for Royal Canadian Air Force; \$15,000 additional for civil air operations; \$80,000 subsidy for steamship service with Antipodes; \$400,000 for construction of steamer for hydrographic surveys; \$100,000 for cable ship; \$205,000 for ice-breaker for Hudson Straits, largely revote; \$250,000 for movement of coal from Alberta and Maritimes to central provinces; \$100,000 for railways mail clerks; \$100,000 for Winnipeg postal employees—authorized by legislation—but vote required to put into effect.

Sub Carries Airplane

A special aeroplane is carried in a special hangar in a submarine and recently successful trials were conducted for the British Air Ministry. The plane is a small two-seater and when the wings are folded back, it can be lowered into a special watertight compartment built into the submarine.

Bread 76 Years Old

A small loaf of bread, said to have been baked Good Friday, March 22, 1853, is on exhibition here. It is owned by Mrs. Bee Hough Bartlett, 89, and was baked by her mother, Mrs. Bartlett says a legend that a loaf baked on Good Friday will endure forever prompted its making and its preservation for 76 years.

Constructive Advertising

Changed Attitude Of The Public Over The Value Of Publicity

Nothing is more remarkable in the business life of this continent than the change that has come over the attitude of people toward the profession of advertising during the past quarter of a century. Time was, and that not so long ago, when every advertisement was scanned with suspicion by the reading public, and in many instances only tolerated by publishers. Today conditions have changed. A speaker at the meeting of the American Newspaper Publishers' Association, in New York, the other day, put the matter this way: "Constructive, truthful advertising," he said, "is the greatest factor in building goodwill. Advertisers are sometimes prone to overlook the fact that advertising mediums printing advertising copy say, in effect, to their readers: 'While we have been unable fully to investigate the statements in this advertisement, we believe them to be the truth, otherwise we would not publish them.'"

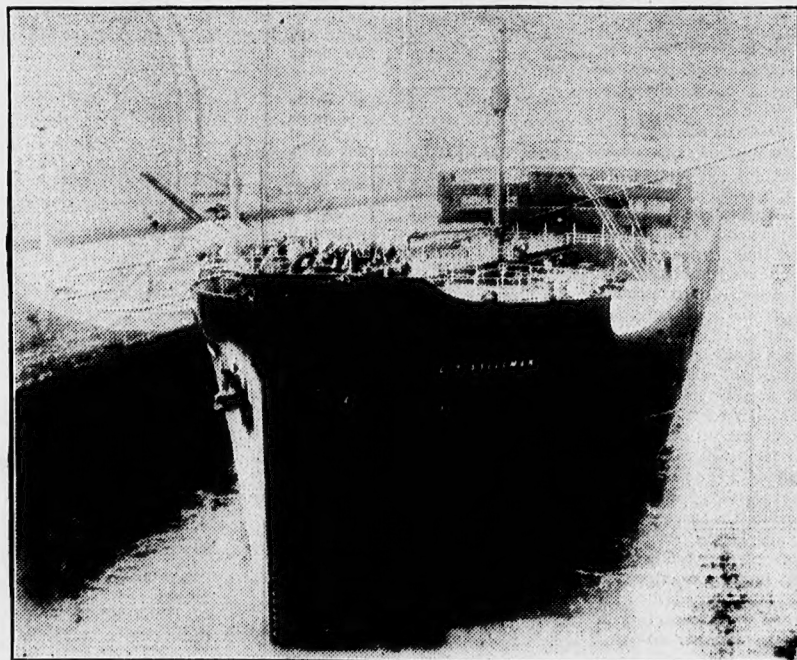

These words contain an exact appraisal of the situation. The advertisement is an essential factor in the business life of the world today. The science of advertising has been developed to a fine art, and the advertising pages in a modern magazine or newspaper are as eagerly scanned by thousands as are the columns of reading matter. Untruthful advertisements are no longer the rule, but the exception and every reputable newspaper guards its advertising columns from what is untrue or of questionable repute as carefully as it does its news columns. In the development of national and international trade, advertising has played a conspicuous part, and has undoubtedly fostered goodwill among men.—Toronto Globe.

Southern Alberta Honey

Two and a quarter tons of apiary frames were delivered to the Riedel Honey Company plant at Taber, Alberta, the other day, shipped by the Alberta Box Company plant at Calgary. The company is preparing for a record season's production.

Professor's Wife—The war started the 1st of August, 1914, didn't it? Prof. (absent-mindedly)—No, my dear, we were really married in 1912.

IN THE PANAMA CANAL

The world's largest tank ship, the "C. O. Stillman" passing through the locks near Colon. The Stillman is named after Mr. C. O. Stillman, of Toronto, President of Imperial Oil Limited, her owners.

A Strange People

Russian Exploration Party Makes Interesting Discovery In Siberia

Discovery of a strange race of people who make a habit of smoking from the cradle to the grave, and who live on a steady diet of animal fat during the winter to keep themselves warm is reported by a Russian exploration party.

Known as the Udeke tribe, these people inhabit the vast virgin woodlands of coastal Siberia. They live in crude dwellings built of branches of trees and bark, and they use leaves and skins as covering.

According to the Russian explorers the total number of the tribe is not more than 1,300. As they have no means of recording events, the history of their origin cannot be learned, but it is presumed that they were driven out of Manchuria and Mongolia several hundred years ago.

Although secluded, they are not shut off entirely from the rest of the world. Russians, Buriats and Korean farmers live in the lower valleys of the rivers in which they fish, and contact with these neighbors is indicated by the finding of firearms among the Mongol tribe.

Keep Your Baby Well and Strong

A baby's health and development depend largely upon the care and food it receives. Your infant should be bathed daily and fed regularly. If you cannot nurse your baby try Eagle Brand Milk.

The foremost infant food—made from rich cow's milk and granulated sugar—especially for babies. Recommended by physicians everywhere on account of its quality and uniformity.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 140 St. Paul St. West, Montreal and they will send you, free of charge, a very helpful baby welfare book containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

Northern Wireless Station

Report Shows Cost Of Installation and Maintenance Of Eight Stations Serving Northland

A report concerning the eight wireless stations in Alberta and in the far north, operated by the Department of National Defence—at Akivik, Herschell Islands, Dawson, Mayo, Fort Simpson, Fort Smith, Fort Resolution and Edmonton—show the cost of construction of the eight stations to have been \$158,330, and that of annual operation \$98,258.

Cheap Electric Power

Electric power rates charged by the Ontario Hydro Electric Power Commission are already the lowest in North America, but there is a possibility of putting them on a still cheaper basis, according to an intimation of the Chairman of the Commission. The annual statement of this publicly-owned organization, recently issued, discloses a net surplus of \$2,016,451.58 last year.

We are using and destroying our forests four and one-half times faster than we are replenishing them.

Canadian Is Planning Flight Across Pacific

Native Of Victoria To Attempt Trip To Orient

The first man to attempt a flight across the North Pacific is a Canadian. He expects to hop off some time during the next two months. Low-lying fogs that hang over the Pacific during the months of June and July may add peril to his adventure, but Lieut. Harold Bromley, native born British Columbian, isn't worrying about the obstacles that face him on his proposed trans-oceanic flight from Tacoma, Wash., to Tokyo.

Lieut. Bromley, whose mother still resides in Victoria, where he was born, is at present in California, supervising the construction of a plane in which he will attempt the epochal air journey. If he succeeds Lieut. Bromley will break many records for long distance flying. He plans to fly the Great Circle route which will take him close to the Aleutian Islands and the Arctic Circle. The distance to be covered is 4,700 miles, which will make the flight the longest single flight on a direct line in aviation history. It will also be the first non-stop flight across the Pacific and will keep the aviator in the air approximately thirty-five hours.

As Bromley's plane reaches the Japanese sea it will probably run in to heavy rains and these will form the hazard second in importance only to the fogs of the western Pacific. However, as shipping travels by the Great Circle route Bromley is not worrying should he be forced down. Chances of rescue at sea, he believes, are favorable.

A well-equipped radio set with which he will be able to keep in communication with half a dozen radio stations along his route will also add greatly to his chances of rescue should he be forced down. Concentrated foods and a few chicken-oyster tablets for use in case of drowsiness are the only rations which this skyfaring young man will take with him on his tour across the ocean.

Winnipeg Newspaper Union
Fashion

UNUSUAL APRON

An unusual apron, cleverly designed, that appears more like a pretty morning frock, is found in Pattern No. 345. It has a comfortable fitting waist, which is cut in one with front panel. The side sections are gathered and dainty sash ties at back. See small view! Japanese pongee silk, cotton crepes in floral design, Zephyr prints or plain or figured sateen will give unending service for general wear, and will launder beautifully. Designed in small, medium and large size. The medium size requires 2½ yards of 40-inch material with ½ yard of 18-inch contrasting. Price 25 cents in stamps or coin (coin preferred.)

Canadian Choristers

Make Splendid Showing In Competition Held In New York

Americans are accustomed to Canada winning high honours at international stock and grain shows, but a surprise was sprung when two Canadian male choirs went to New York and captured second and third places in competition with the best male choirs of the United States. These were the Ottawa Temple Choir, and the Peterboro (Ontario), Male Chorus, awarded two of the first three places in the "B" Class of the international choral contest. First prize went to the Baltimore and Ohio Railroad Glee Club of Baltimore, with 88½ points out of a possible 100, the Ottawa Temple Choir was next with 87½ points, and the Peterboro Male Chorus third with 85½ points. The contest was one of the features of a two-day choral festival held under the auspices of the Associated Glee Clubs of America, in which 75 choirs from the United States and Canada took part, totalling 4,000 voices. In the contest in which the two Canadian choirs scored second and third places, 14 choirs were entered.

Science Keeping Up

Can Manufacture Enough To Take Care Of Increasing Population

The population of the world is growing more rapidly today than ever in the past. How is this vast population to be nourished and clothed? There is only one thing to be done, to use science to find ways of maintaining life where formerly it looked for new ways of creating death. The task need not frighten us. This old world has plenty of huge areas uninhabited, and the earth can produce a hundred times as much as it is producing in our day. When we know what a good gardener can produce from his two hundred feet of land; when we consider that chemistry can prepare new fabrics indefinitely to take the place of wool and silk, when we examine the multitude of new inventions to add to the number not merely of the necessary things, but of the articles of luxury, there is no need to be too frightened of an excess of population.

Canadian Fish For Britain

Large Supplies Of Fresh Fish To Be Shipped In Fast Refrigerator Steamers

Major Hugh A. Green, former director of fish supplies for the Canadian Expeditionary Forces, is in Ottawa from England conferring with the Government in regard to the purchase by a British firm, of which the Major is now managing director, of large supplies of fresh fish—at least 1,000 tons weekly—which will be conveyed to the British Isles by fast, refrigerator steamers plying between the Maritimes and Great Britain.

Too Valuable To Wear

Eskimos in northern Alaska may cease to have the distinction of being fur-clad people, for economic reasons. Furs are now too valuable to wear, these thrifty folk feel, and they fashion clothes of reindeer, and caribou hides, with white man's woollens and the old time Hudson Bay blankets for extra warmth.

Government To Treat Sands
Announcement is made that the Dominion Government will build a \$30,000 plant at Edmonton for the extraction of bitumen from tar sands. These sands are contained in vast deposits in the Athabasca district.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.
